## **Indirectly-Generated Mention of the GECF:**

### **1. Mozambique eyes great future as it marks 48th Independence Day**

In view to continuously improve the relationship between the two countries, in February 2022, President Filipe Jacinto Nyusi paid a working visit to Qatar to attend the VI GECF Summit of Heads of State and Government of the Gas Exporting Countries Forum held in Doha following an invitation from His Highness the Amir Sheikh Tamim bin Hamad al-Thani. That historic visit was marked by the accession of Mozambique as Observer to GECF and an opportunity to discuss with His Highness the Amir and government members on mechanisms to reinforce the bilateral co-operation in the near future.

### **2. NATO against Evo Morales**

Evo Morales was in Moscow, attending the **Gas Exporting Countries Forum**. On July 2, 2013, he boarded presidential plane FAB 001 to return to Bolivia. While crossing European skies, on a flight that seemed routine, Portugal, Spain, Italy and France laid an impassable siege, abruptly canceling the flight permits they previously granted. The plane only had fuel to reach the Canary Islands, where it had to recharge. The pilots were forced to search for a nearby airport and were able to make an emergency landing in neutral Austria.

#### **8. Report shows IEA Net Zero Roadmap a green mirage**

The RealClear Foundation asked the Energy Policy Research Foundation, Inc. (EPRINC) to conduct a forensic analysis of the IEA's major reports on net zero and assess the likely economic impact of a cessation of investment in new oil and gas fields. EPRINC's analysis conclusively demonstrates that the IEA's assumptions are unrealistic, internally inconsistent, and often support the case for increased hydrocarbon fuel production.
